Evaluation of the Achievement of the Biology Education Study Program Research Roadmap

A. Biology Education Research Roadmap

Achievement of the Biology Education Study Program Research Roadmap

The achievements of the Biology Education Study Program's research, which refer to the Research Roadmap for 2024, are calculated on a percentage scale for each coverage area, which is a research theme and an indicator of the Research Roadmap. The following data was obtained from the measurements.

Based on the data obtained, research related to biology learning resources and media reached 42%, Biology Education Assessment and Evaluation reached 12%, and Creative and Innovative Learning Models reached 16%. For 2025, the balance between the quantity and quality of research in each research area must be improved.
